EXPERIENCE

Playbook Sports

October 2025 – Present

AI Automation Engineer

Remote

- Built a weekly CRM email report that gives a clear overview of revenue, client progress, and issues, saving about 6 hours of manual reporting each week.
- Created an automated pipeline that creates a custom AI voice agent per client in the CRM — pulling details from their website to build the agent, assigning it a phone number, loading a client-specific knowledge base, and routing, transferring, and logging every call it takes.
- Created a daily support report from the CRM that rates resolved customer issues and tracks how quickly each support agent handles tickets, including average, median, and worst-case response times.
- Built an automated campaign system that recommends games, delivers promotions via email and SMS, and enforces cooldowns, suppression rules, and database-level safeguards to prevent accidental customer sends.

Ampleon Philippines Inc.

May 2025 – August 2026

Factory Automation Intern

Cabuyao, Laguna

- Built a web tool that automatically checks which test files exist for each production lot and displays them in one searchable, filterable table, replacing the need to open and inspect dozens of folders one by one, and updating itself whenever files change.
- Built a tool that automatically records every file that appears or disappears in selected folders, both on the computer and on remote servers, keeping a permanent timestamped history that anyone on the network can view through a web page without installing anything.
- Documentation of Test Process of the machines in manufacturing of RF Semiconductor products.
- Built a monitoring interface that shows order requests for machine components used in the company.

EDUCATION

Mapua Malayan Colleges Laguna

2022-2026
